

Date: 9th August, 2011

Participants:

T. d. S. Rolo, D. Haenschke, T. Baumbach

Discussion required functionality Lamino/RCI/UFO

- Degrees of freedom for RCI detector system
- Access to whole hemisphere required (use case: GID rocking curve imaging)
- Detector needs no scanning possibility, just positioning
- Necessary to define abstract functionality classes, use cases as examples
- Visualize demands of different functions for the setup, proposal: table
